ADDENDUM 5

Question:

We and our glass subs have been having trouble getting a hold of anyone at Avalon Windows. The number on the plans is now direct to a spam automated service. Searching for the model number also doesn't pull up anything. Is the correct company Avalon Windows & Doors or is under a different name? Is there a better contact number for them?

Response:

Avalon is now out of business and Sherwin has been directing everyone in the direction of Mike Cavasus for these windows:
